Problem: Creativity bottlenecks are real and painful.

– Users struggle with idea overwhelm, blank-page syndrome, and lack of emotional clarity.

– Traditional brainstorming tools don’t engage the subconscious or somatic (felt) imagination.

– Generative AI lacks intuitive pacing and emotional depth during ideation.

Need: A space that enables intuitive, emotionally resonant idea emergence.

Solution: Dream Workshop is an immersive, meditative ideation tool

– Combines storytelling, mindfulness, and creative brainstorming

– Uses a slow-paced, guided session model

– Session types: role-play, experiential meditation, or creative exploration

– Outputs: idea summary, insights list, actionable next steps.

Market Opportunity

The intersection of creative productivity and wellness apps is a rapidly expanding

market, projected to reach tens of billions of dollars as these categories converge.

250M+ global mindfulness app downloads/registrations (active user base is smaller but growing)

150M+ users of modern creative and ideation platforms (Canva, Adobe Express, Miro)

Growing demand for emotionally intelligent AI experiences (across creative and wellness sectors)

Emerging niche: guided inner journey apps for innovation, healing, and clarity

Join Adobe Incubator to co-develop this field-defining tool

Needs

Access to Firefly APIs, Express design system, Creative Cloud integration, mentorship for go-to-market

Market Validation & Product Fit

Validate Market:

Surveys and alpha testing with Adobe Express/Creative Cloud users

Test Fit:

Track retention and satisfaction through beta feedback

Key Resources

Firefly/Express APIs, UX/data support, voice talent

Talent Needs:

1–2 engineers, voice designer, clinical advisor

Timeline

4–6 months to MVP launch
